

Case-Based Interventional Neuroradiology: A Comprehensive Guide by Timo Krings

Interventional neuroradiology (INR) is a rapidly evolving field that combines advanced imaging techniques with minimally invasive procedures to diagnose and treat a wide range of neurological conditions. Case-based interventional neuroradiology is a valuable tool for practitioners to refine their skills, stay abreast of the latest advancements, and improve patient outcomes.

Paperback	: 168 pages
Item Weight	: 9.5 ounces
Dimensions	: 6.14 x 0.37 x 9.21 inches

In this comprehensive guide, renowned expert Timo Krings presents a detailed overview of case-based interventional neuroradiology. Through real-world examples and in-depth discussions, Krings provides a practical understanding of the indications, techniques, and outcomes of various INR procedures.

Key Features

- **Extensive case coverage:** The guide includes a wide range of cases covering various neurovascular disorders, such as ischemic stroke, hemorrhagic stroke, brain tumors, and vascular malformations.
- **Multidisciplinary approach:** Krings collaborates with neurosurgeons, neurologists, and other specialists to provide a comprehensive perspective on case management.
- **High-quality imaging:** The guide is richly illustrated with high-resolution images and videos that demonstrate the latest imaging techniques and interventional procedures.
- **Practical guidance:** Krings shares his insights and best practices based on years of experience, providing valuable guidance for practitioners at all levels.
- **Evidence-based content:** The guide draws upon the latest scientific evidence and clinical trials to ensure accurate and up-to-date information.

Target Audience

Case-Based Interventional Neuroradiology is an indispensable resource for:

- Interventional neuroradiologists
- Neurologists
- Neurosurgeons
- Radiologists
- Trainees in these fields

By understanding the complexities of neurovascular disorders and the nuances of INR procedures, practitioners can enhance their skills and deliver optimal care to their patients.

Author

Timo Krings is a world-renowned expert in interventional neuroradiology. As the Director of Neuroradiology at the University Hospital Bonn, Germany, Krings has extensive experience in the diagnosis and treatment of 脑血管疾患. He is a prolific author and researcher, having published over 300 scientific articles and authored several books.

Order Today

Case-Based Interventional Neuroradiology is available for purchase through major booksellers and online retailers. To order your copy today, please visit our website or contact your local bookstore.

Invest in your professional development and enhance your skills in interventional neuroradiology. Order Case-Based Interventional Neuroradiology by Timo Krings today and unlock the latest advancements and best practices in the field.
